

One Kilo Mini-Revelation

Patent Pending

American Made, Hand Built Quality

Smoke-less Design. The Mini Rev. is equipped with a catalyst, producing low CO₂, low exhaust heat, and **zero smoke**. Now you can roast inside without the worries of using a vent! Recirculating the air through the catalyst prevents the heavier aromatic compounds that produce off flavors from reaching the drum while saving you energy and protecting the environment.

Four
Roasts per
Hour!

Wireless Cloud Enabled. Upload and download Roasting Profiles from our server. Empress your customers with roast profiles developed from master coffee roasters. Ensure the same cup of coffee every time, no matter what location! Share your roasts with our roasting community or between several store locations.

Changeable Drums. Roast coffee, cocoa, peanuts, and more by simply changing the roasting drum. The drum is easy to remove, making cleaning faster and less complicated. Unlike Air Roasters, Drum Roasters allow for **dual path heating** providing that extra flavor your customers are sure to enjoy!

Energy Saving. The Mini Rev. cleans the hot air from the drum and recirculates it back into the roaster, saving you energy. This roaster uses approximately 7,000 BTUs (averages 5,000 full load) with the option of electric or gas hybrid fuel sources. The fully electric option is **15 amps 220V single phase**.

User Friendly. Now roasting can be as simple as pushing a button! The Mini Rev's User Interface allows for automatic or manual control and is designed for all skill levels. With Downloadable Profiles just about anyone can Roast Great Coffee! Easiest to operate, and maintain of any roaster! **Free One-on-one training session is provided in Oklahoma City!**

and Gas Hybrid pricing

Features and considerations. The Mini Revelation provides what you and your customers want. Your customers want and buy Organic, Free trade and other Earth Friendly products; most are also concerned about pollution and the environment. Be the first in your market to do something to show them you care too! You need to be prepared to stay in business with higher energy costs that will continue to rise. Equipment that requires less time to operate and maintain will save costs also. The total electric unit is designed to be able to operate with no stack.
