*Welcomes You To The CLOUD!*

Tel: 405.232.1223

## The CLOUD

**What Is The Cloud?** *The Cloud* is a way of storing information over the internet. This information is stored on databases found on internet servers. Using *The Cloud*, information can be easily accessed and shared by WIFI and Ethernet enabled devices.

## The Mini Revelation

The **US Roaster Corp** is bringing its newest line of premium roasters, The Mini Rev, to *The Cloud*.

Users will be able to download professional roasting profiles as well as upload their very own.

One goal of Cloud integration is to create a community where roasting profiles can be shared between amateur and professional roasters.

Using private databases, users can also choose who they want to share their profiles with. This will allow chain coffee shops to share roasting profiles between shops, but not with the community.
