

# One Kilo Mini-Revelation

Patent Pending

*American Made, Hand Built Quality*

**Low emissions Designed.** The Mini Rev. is equipped with a catalyst, producing low CO<sub>2</sub>, low exhaust heat, and **practically smokeless**. Now you can roast inside without the worries of using a vent on electric model! Recirculating the air through the catalyst prevents the heavier aromatic compounds that produce off-flavors from reaching the drum, all while saving you energy and protecting the environment.

**Wireless Cloud Enabled.** Upload and download **Roasting Profiles** from our server. Impress your customers with roast profiles developed from master coffee roasters. Ensure the same cup of coffee every time, no matter what location! Share your roasts with our roasting community or between several store locations. Or you can roast manually with full control.

**Changeable Drums.** Roast coffee, cocoa, peanuts, and more by simply changing the roasting drum. The drum is easy to remove, making cleaning faster and less complicated. Unlike Air Roasters, Drum Roasters allow for **dual path heating** providing that extra flavor your customers are sure to enjoy!

**Energy Saving.** The Mini Rev. cleans the hot air from the drum and recirculates it back into the roaster, saving you energy. This roaster uses approximately 7,000 BTUs (averages 5,000 full load) with the option of electric or gas hybrid fuel sources. The fully electric option is **35 amps 220V single phase**. Gas Hybrid units should be vented.

**User Friendly.** Now roasting can be as simple as pushing a button! The Mini Rev's User Interface allows for automatic or manual control and is designed for all skill levels. With Downloadable Profiles just about anyone can Roast Great Coffee! Easiest to operate, and maintain of any roaster!

**Free One-on-one training session is provided in Oklahoma City!**

# One Kilo Mini-Revelation

Patent Pending

*American Made, Hand Built Quality*

**Specifications.** The Mini Rev is **100% Manufactured in the USA**. Weighing in at around 200lbs, only the best heavy gauge steel is used to ensure the quality and durability of your investment. The control system is **508a ULC Listed**. With a 32x20x30 (in) footprint, the roaster consists of a steel body with heavy gauge steel tubing, and hand crafted heavy-duty stainless steel drum and cooler. Our new and advanced desktop app allows you to control and follow your roast profiles in real-time all from a laptop. Integrated self diagnostics and state of the art desktop controls are just a few of the reasons why this is the most advanced roaster on the market; contact us today to hear some more!

**Features and considerations.** The Mini Revelation provides what you and your customers want. Your customers want to buy Organic, Free trade and other Earth Friendly products; most are also concerned about pollution and the environment as well. Be the first in your market to do something to show them you care too! You need to be prepared to stay in business with higher energy costs that will continue to rise. Equipment that requires less time to operate and maintain will save costs also. The total electric unit is designed to be able to operate with no stack.
